

Trend Micro™

IM SECURITY FOR MICROSOFT™ LYNC

Instant Protection for Instant Messaging

A growing number of companies are using instant messaging to connect employees, partners, and customers in real time. While live communication improves productivity, it also presents a new opportunity for cybercriminals to work more quickly, spreading malware, luring victims to malicious sites, and stealing data in a flash. Plus, it raises compliance and confidentiality issues for data sent over IM and federated communications with partners.

Trend Micro™ IM Security for Microsoft™ Lync provides threat and data protection for Microsoft Lync servers. Top-rated malware and ULR filtering block phishing messages and malicious file transfers. And built-in Data Loss Prevention (DLP) templates control the use and loss of sensitive compliance data. This real-time security solution helps you avoid conflicts of interest with new communication controls that simplify the set up of blocks or ethical walls. It also helps you minimize your threat exposure with messaging content filters that warn users of risky user behavior before damage can occur. And it simplifies management complexity with central server management, single-sign on, and role-based administration.

KEY ADVANTAGES

Award-winning Threat Protection

- Correlates more threats using big data analysis and a vast army of threat sensors.
- Detects and removes viruses, Trojans, and other malicious files using top-rated malware scanning and file type filtering policies
- Blocks messages containing malicious web links using correlated threat intelligence from the Smart Protection Network
- Stops targeted attacks and zero-day threats with phishing filters and signature-independent technology
- Purges infected messages and attachments before delivery
- Protects productivity by using with data validators to reduce false positives
- Instantly scans messages for unprofessional conduct such as harassments or profanity.
- Warns users before blocking messages to minimize risk

Compliance and Conflict of Interest

- Allows administrators to set up limits using communications controls
- Builds communication blocks or ethical walls between certain groups to easily define which individuals or groups can contact others
- Supports temporary usage of ethical walls by enforcing expiration dates
- Lets administrators place limits on chat messages, instant meetings, and voice or video calls

Flexible Content Filtering and Data Protection

- Streamlines deployment with customizable, template-based DLP
- Prevents loss of sensitive data by filtering messages
- Makes it easy to set up policies to monitor or block risky content using nearly 400 built-in templates, regular expressions, and editable dictionaries

Software

Protection Points

- IM server

Threat Protection

- Web threats
- Zero-day threats
- Viruses, worms, Trojans
- Spyware
- Phishing
- Data loss
- Inappropriate content
- Conflict of interest

Key Benefits

- Blocks dangerous messages before they reach users
- Filters malware from file transfers
- Simplifies compliance
- Keeps instant communications professional with content filtering
- Avoids conflicts of interest and protects privacy by creating ethical walls
- Lowers administration time and cost

Lower Administration

- Streamlines management by leveraging Active Directory, SIP Domains
- Requires less time for group policy definition, system configuration, and update deployment
- Provides enterprise-wide visibility with scheduled and real-time reports
- Centralizes reporting across security layers with Trend Micro Control Manager
- Simplifies management with easy local or remote installation and single sign on
- Supports role-based access to prevent policy modifications from a lower level administrator

MINIMUM SYSTEM REQUIREMENTS

Hardware

- 512MB RAM of memory
- 1GB of free disk space

Windows Operating System

- Microsoft™ Windows™ Server 2012 R2
- Microsoft Windows Server 2012
- Microsoft Windows Server 2008 R2 (64-bit)
- Microsoft Windows Server 2008 with Service Pack 2 (64-bit)
- Standard, Enterprise, or Datacenter editions only

Office Communications Server Platforms

- Microsoft™ Lync Server 2013 (Front End Server)
- Microsoft Lync Server 2010 (Front End Server)
- Standard or Enterprise versions

Additional Requirements

- Microsoft™ Internet Information Services (IIS) 7.0, 7.5, 8.0, 8.5
- Web browser that supports frames, such as Microsoft™ Internet Explorer 7.0 or Firefox 3.0 or later
- .NET framework 3.5 SP1

• High Performance,
• Low Administration

• IM Security is built on the same
• technologies that make [ScanMail™ Suite
• for Microsoft™ Exchange](#) an industry
• leader. Both products deliver powerful
• protection, optimized performance, and
• low administration.
