

Trend Micro™

WORRY-FREE™ BUSINESS SECURITY SERVICES

Simple to manage protection, so you can focus on your business.

Worry-Free Business Security Services will provide your small business with industry-leading protection for your Windows, Mac, and Android devices from a secure, web-based console.

With Worry-Free Business Security Services, you can manage all of your devices from anywhere and always feel confident that your information is safe. It is powered by the Trend Micro™ Smart Protection Network™- a worldwide early warning system that blocks threats before they can reach your business machines. Your devices will have constant access to the latest threat information protecting millions of enterprises, small businesses, and consumers every second of every day around the globe.

As a hosted security service, Worry-Free Business Security Services is a snap to install and easy to manage. For further convenience, it now features dashboard integration with Microsoft Windows Server 2012 Essentials.

PROTECTION AGAINST VIRUSES, DANGEROUS WEBSITES, AND LOSING DATA

With Worry-Free Business Security Services, you don't have to worry about viruses, threats, and dangerous websites. And if you have a server, Worry-Free Business Security will protect it along with your other systems. Because it's all automatically managed for you, there's no need to be concerned about updates or lost data with Worry-Free Business Security Services.

IF YOU DON'T HAVE THE TIME AND KNOW-HOW TO MANAGE YOUR OWN ON-PREMISE SECURITY, WORRY-FREE BUSINESS SECURITY SERVICES IS YOUR IDEAL SOLUTION.

If your security isn't continuously updated, you may be vulnerable to infections that can disable your machines. Hackers could easily steal from your business. Do you have an on-premise security server? If so, do you have the time and resources it takes to configure and maintain it, track policy updates, and stay current on the latest web threats? If you're like most small companies, you don't have the time or expertise on staff. We do. There's a better choice for your security: Worry-Free Business Security Services.

Key Benefits

- Monitors, updates, and protects all of your computers automatically
 - Secures PCs, laptops, servers, Macs, Android devices and more
- Stops threats before they reach your business
- Protects computers whether in the office or on the road
- Blocks employee access to unwanted websites
- Prevents infections from USB storage devices
- Locks down confidential and financial data
 - Works with Windows 8
 - Integrates with Microsoft Windows Servers 2012 Essentials
 - Easy to set-up and manage

"This was our first experience with software as a service. We found it very easy to get started with Trend Micro Worry-Free Business Security Services, and switching to it went smoothly. This solution is really effective and really simple."

—Todd Mills, Director, Director of Development and Marketing, Local Matters

BENEFITS FOR SMALL OFFICES

Protects your valuable business machines, data and files	You can safeguard your PCs, Macs, Androids and data from threats. Also, you can use a unique feature to specifically lock-down Intuit Quickbooks® files and folders.
Protects you from threats that come via USB devices or Wi-Fi connections	Your employees are protected from viruses carried on USB devices, and from hackers that attack when your computers log on via wireless networks.
Provides global neighborhood watch	Trend Micro Smart Protection Network has more than 70 million threat sensors worldwide identifying and blocking new Internet threats.
Easy to set up	Just register, login, connect to protect—and you're secured. No server required. Just register online and receive instant access to the service. Then, simply connect each machine. Also, it's compatible with Windows 8.
Easily manage and monitor security	Centrally manage your desktops, laptops, and servers from anywhere. Get quick overviews and alerts to identify high-risk areas and schedule reports.
Always up-to-date threat prevention	The Smart Protect Network™, a firewall, and advanced behavior-based protection ensure your computers are never unprotected.
Won't slow your computers down	The service connects to our Smart Protection Network and processing occurs in our datacenters so antivirus defense won't slow down your machines.
Restrict access to the Internet	To improve productivity, you can filter out websites to ensure only appropriate sites are visited by employees at times you deem appropriate.
Protects your investment	Prevents employees from tampering with the security.

WORRY-FREE™ REMOTE MANAGER FOR YOUR IT SERVICE PARTNER

If you'd rather have your trusted IT services partner monitor your security status and alerts, Trend Micro Worry-Free™ Remote Manager provides an intuitive management console that allows your IT partner to remotely manage Worry-Free Business Security Services for you.

Worry-Free Remote Manager can now also be integrated with industry-leading RMM/PSA tools like ConnectWise, Kaseya IT automation framework, and Autotask, to simplify support and customer management for MSPs that leverage these solutions.

TREND MICRO HOSTED SECURITY SERVICES

- Worry-Free Business Security Services—protect small businesses with always-on security whenever and wherever your computers connect.
