# Collaboration & Storage Security for Managed Service Providers

Email, instant messaging, and collaboration systems are mission-critical applications your customers rely on—but these applications can quickly propagate malware if no protective measure has been taken. In this real-time environment where cybercrime is on the rise, attackers can spread malware, hijack systems and steal data, and inflict severe damage to a business. This is why immediate, real-time protection is critical.

Trend Micro Collaboration and Storage Security Solutions provide immediate and ongoing protection for internal messaging and collaboration systems, vulnerable points likely to be exploited by malware and cybercriminals. Real-time protection, such as email and Web reputation scanning, work together with leading content security technologies to prevent data theft, infection, reputation damage, and compliance violations.

Trend Micro provides dedicated anti-malware protection for Microsoft Exchange, Office Communication Server (IM), and SharePoint, as well as Lotus Domino. Additional solutions are also available for securing storage devices, from simple servers to high-performance Network Attached Storage (NAS) devices, including those from EMC and NetApp.

## KEY FEATURES

### Web Reputation

- Blocks messages and SharePoint content containing malicious links
- Stops zero-day threats based on source reputation, much like an instant background check

### Email Reputation

- Stops increasingly targeted and blended threats without pattern file updates
- Utilizes real-time intelligence such as source, URLs and content characteristics for immediate protection

### Award-Winning Anti-malware Security

- Detects and blocks viruses, worms, and Trojans with real-time scanning
- Protects against zero-day threats using behavioral analysis

### Advanced Spyware Protection

- Stops spyware, rootkits, and bot code before they can infect your PCs
- Thwarts multistage attacks that use spyware to steal data

### Content Filtering & Data Leak Prevention

- Protects against offensive language and sensitive data loss
- Filters outgoing messages and files to prevent the loss of sensitive data

### Leading Anti-spam

- Leading composite engine blocks increasingly malicious spam
- Uses innovative techniques for multi-lingual and attachment spam detection

### Innovative Anti-phishing

- Stops malicious email and IMs that link to spoofed sites designed to steal data
- Leverages in-the-cloud Web threat intelligence for immediate protection

### Central Control

- Reduces time for deployment, updates, and routine administration

### Unified Security

- Prevents data theft, infection, compliance violations, and reputation damage

## THREAT PROTECTION

- Antivirus
- Anti-spyware
- Anti-rootkit
- Anti-malware
- Web Threat Protection
- Inappropriate content

## KEY BENEFITS

- **Immediate Protection**  
Breaks the infection chain by blocking access to malicious files and websites
- **Reduce Business Risks**  
Provides a line of defense at the server, whether physical, virtual or in the cloud
- **Comprehensive Security**  
Shields known and unknown vulnerabilities in applications and operating systems
- **Lower Resource Expenditure**  
Reduces IT management costs through award-winning, automated protection and maintenance
- **Additional Recurring Service Revenue**  
Increases the average revenue per customer; high retention rate means solid recurring and predictable service revenue
- **Pay-as-you-use Licensing and Pricing**  
Service Provider pays only for the number of licenses used during the previous month
- **Flexible Payment Schemes**  
Flexible usage-based pricing easily aligns with your business model and billing cycle
- **Improved Cash Flow and Reduced Financial Risk**  
Zero start-up cost and no up-front investment needed
- **Unparalleled Support**  
Extensive, award-winning global support network ensures that you and your customers are supported at all times

**GAIN COMPETITIVE ADVANTAGE**

The Service Provider Usage-based License Program (SPULP) enables Service Providers of all kinds to take advantage of leading security solutions from Trend Micro with the pay-as-you-use payment and subscription model. This payment model is designed to align with your business models and help them deliver scalable security solutions over the Internet. Through SPULP, we can empower Service Providers targeting business of all sizes to offer attractive and profitable managed services cost effectively.

**TREND MICRO SMART PROTECTION NETWORK**

Trend Micro Collaboration and Storage Security Solutions are powered by the Trend Micro Smart Protection Network, a next-generation cloud-client security infrastructure designed to protect customers from Web threats.

The Smart Protection Network powers both on-premise and hosted solutions to protect users whether they are on the network, at home, or on-the-go, using lightweight clients to access its unique in-the-cloud correlation of email, Web and file reputation technologies, as well as threat databases. Customers' protection is automatically updated and strengthened as more products, services and users access the network, creating a real-time neighborhood watch protection service for its users.

**PROTECTION POINTS**

- Email
- Instant Messaging
- Collaboration

**ABOUT TREND MICRO**

Trend Micro Incorporated, a global leader in Internet content security, focuses on securing the exchange of digital information for businesses and consumers. A pioneer and industry vanguard, Trend Micro is advancing integrated threat management technology to protect operational continuity, personal information, and property from malware, spam, data leaks, and the newest Web threats.
