Trend Micro™

Endpoint Security Solutions for Managed Service Providers

Today your customers' endpoints face over 2,000 new and unique malware attacks per hour. Even more frequent pattern file updates cannot keep up with such a volume of attacks. And managing increasingly larger pattern files is slowing endpoints and taxing administrators. In addition, most endpoint solutions are simply not equipped to evolve to keep pace with the dynamic nature of today's threats.

Trend Micro Endpoint Security Solutions offer Service Provider customers a revolutionary new defense against threats—both on and off the corporate network. Combining world-class anti-malware with innovative in-the-cloud protection from the Trend Micro Smart Protection Network, these solutions allow endpoints to manage the thousands of faster, more insidious content security attacks released every day.

The innovative security architecture of Trend Micro Endpoint Security Solutions enables businesses to quickly deploy protection across all desktops, laptops, and servers, regardless of connectivity. Each solution is also developed to provide maximum protection against data-stealing malware, botnet infections, and other blended threats without straining the endpoint's resources.

KEY FEATURES

File Reputation

Split-second queries on the safety of a file before it's accessed

Web Reputation

Defends against Web-based malware, data theft, lost productivity, and reputation damage

Immediate Protection

Provides round-the-clock protection for endpoints, on or off the corporate network

Automatic Threat Response

Feeds threat information to Smart Protection Network for faster inspection and automatic protection

Web Surfing Safeguard

Protects customers and applications from accessing malicious or infected websites

Superior Malware Protection

Protects against viruses, Trojans, worms, spyware, and new variants as they emerge, detecting and removing them automatically

Rootkit Detection and Removal

Easily detects and removes active and hidden rootkits

Ease-of-Management

Automatically cleans endpoints of malware, including processes and registry entries that are hidden or locked

Single-console Control

Enables centralized management with a single, Web-based console

Extended Platform Support

Integrates seamlessly with your customer's infrastructure and provides safe migration

Security Simplified

Scans, detects, and removes malware from files and compressed files in real time with minimal impact on servers or CPUs

Reduced Resource Footprint

Drastically reduces the management burden commonly associated with conventional solutions

THREAT PROTECTION

- Viruses
- Web threats
- Spyware
- Rootkits
- Network worms
- Hackers
- Blended threats

KEY BENEFITS

- **Immediate Protection**
Breaks the infection chain by blocking access to malicious files and websites
- **Reduced Business Risks**
Prevents infection, identity theft, data loss, network downtime, lost productivity, and compliance violations
- **Lower Resource Expenditure**
Reduces IT costs for your customers through award-winning automated protection and maintenance
- **Additional Recurring Service Revenue**
Increases the average revenue per customer; high retention rate means solid recurring and predictable service revenue
- **Pay-as-you-use Licensing and Pricing**
Service Provider pays only the number of licenses used during the previous month
- **Flexible Payment Schemes**
Flexible usage-based pricing easily aligns with your business model and billing cycle
- **Improved Cash Flow and Reduced Financial Risk**
Zero start-up cost and no up-front investment needed
- **Unparalleled Support**
Extensive, award-winning global support network ensures that you and your customers are supported at all times

GAIN COMPETITIVE ADVANTAGE

The Service Provider Usage-based License Program (SPULP) enables Service Providers of all kinds to take advantage of leading security solutions from Trend Micro with the pay-as-you-use payment and subscription model. This payment model is designed to align with your business models and help them deliver scalable security solutions over the Internet. Through SPULP, we can empower Service Providers targeting business of all sizes to offer attractive and profitable managed services cost effectively.

TREND MICRO SMART PROTECTION NETWORK

Trend Micro Managed Service Provider Endpoint Solutions are powered by the Trend Micro Smart Protection Network, a next-generation cloud-client security infrastructure designed to protect customers from Web threats.

The Smart Protection Network powers both on-premise and hosted solutions to protect users whether they are on the network, at home, or on-the-go, using lightweight clients to access its unique in-the-cloud correlation of email, Web and file reputation technologies, as well as threat databases. Customers' protection is automatically updated and strengthened as more products, services and users access the network, creating a real-time neighborhood watch protection service for its users.
